Driving Systems for disabled drivers

With reference to the Hand Driving Systems, the following alternative methods shall be followed:

- 1) certification presented by the TCR car manufacturers/authorized engineering company to WSC as an official VO.

- 2) Driving Systems for disabled drivers adopted by Competitors, mounting components certified by competent authorities for open roads or racing use, may be accepted by the technical delegate of any TCR Competitions where the modified car is intending to race, at his discretion and responsibility.

Option (2) is possible if option (1) is not supported by the car Manufacturer.

General Secretary of the Technical Department
